

**DEPARTMENT OF HEALTH SERVICES**107 SOUTH BROADWAY, ROOM 7011  
LOS ANGELES, CA 90012

(213) 620-2380

PRELIMINARY ASSESSMENT SUMMARYCentrifugal Casting Company  
A.K.A. Certified Alloy Company  
3245 Cherry Avenue  
Long Beach, CA 90807

May 1985

Preparer: Richard Brausch  
Toxic Substances Control Division  
Southern California Section  
(213) 620-2380History and Problem:

This site was first used when Centrifugal Casting opened a shop in 1947. Their processes were pig, ingot, and centrifugal casting. In these processes, they produced wastes of alkaline sludge, oil emulsions, and solvents. These processes continued unchanged until 1984, when they discontinued doing centrifugal castings.

Wastes are collected in subsurface, concrete-lined pits and sumps. These are pumped, as needed, by Chancellor and Ogden. They have had regular inspections by the Long Beach Department of Health and Los Angeles County Sanitation.

Recommendation:

No evidence of on-site disposal of hazardous wastes has been found in regulatory agency records. Staff recommends continued inspection by local regulatory agencies. No further action under the Abandoned Site Assessment Program.

A copy of this file will be provided to the City of Long Beach Department of Health.
